

Chemical Name : tetrabromobisphenol-A carbonate oligomer [**Note:** Phenoxy-terminated]

Synonyms: TBBPA carbonate oligomer BC-52;

CAS NO. : 94334-64-2

Chemical Formula: (C₇H₅O₂).(C₁₆H₁₀Br₄O₃)_n.(C₆H₅O)

Structure formula :

1 Specifications

Appearance :	White Powder
Color	96Min.
Melting Point :	195-230°C
Content of Br :	52%Min.
Weight Loss on Heat	1% @ 370 °C 5% @ 410 °C
Volatile Materials:	0.15% @ 130 °C

2 Applications:

Used in polyolefins, high-impact polystyrene thermoplastic polyesters as ABS,PC,PBT, PET,etc.,

3 Narrate:

3.1 white color ,outstanding thermal and UV stability, non-blooming, excellent wet electrical properties;

3.2 an unique white-colored additive that combines stable, aromatic with an imide's structure;

4 Packing: 25Kg PP Bags or Paper Bags.
