

Chemical Name: Magnesium Bromide

molecular formula: $MgBr_2 \cdot 6H_2O$

molecular weight: 292.22

CAS: 13446-53-2

1 Grades & Specifications

Product Formular	$MgBr_2 \cdot 6H_2O$
Assay	98% min
Appearance	White crystal powder
Weight Loss on drying	1.0% max
Chloride	0.5% max
Sulphate	0.1% max
Fe	0.0005% max
Heavy metal	0.0005% max
P.H Value	6-8

2. Applications

2.1 mainly used in Battery Fields;

2.2 Also used as sedative and material for organic combination.

3. other properties

3.1 This product reacts with water and gives off heat;

3.2 Its Melting Point is $700^{\circ}C$;

3.3 Store in a cool, well-ventilated, dry and shaded storehouse.

4. Packages

Usually use 25kg Plastic Bags.
